2019 Catalog

Published March 2019

Catalog Revision 2019A – Supersedes All Previous Revisions

A message from our President:

The Jerald Sulky Company is noting our 121st year of service to the horse business. Our goal remains the delivery of the absolute best performance horse-drawn vehicles and the development of a company ready to *drive forward* for another 121 years. In 2018 we invested in our infrastructure and production facility. (Have you been to the factory for a tour? If not put it on your bucket list!) For 2019 we have even bigger goals. Stay tuned for a product line announcement that will broaden our catalog to include another critical horse industry product - also to be made here in Waterloo.

New for 2019 is a major change in the way we engage our clients and the secondary marketplace. For the past 120 years we have looked at ourselves as a manufacturer of new product and a refinisher of customer-loved and owned equipment. As we work to support industry trends, we are announcing a factory equipment buy-back and refurbishment program. Through this program we will actively acquire used equipment that has a meaningful quantity of sound parts; from this equipment we will offer a line of top-end factory refurbished equipment at a lower-than-new price point. This equipment will support the marketplace in two ways; it will provide an exit for owners that have equipment to disperse and will provide a lower cost entry point for new entrants to the expanding competition driving industry. This program is available both direct and through our dealers. Please talk to an Authorized Jerald Sulky Dealer or our office regarding equipment you have to sell or about available refurbished inventory.

This catalog is intended to help you understand how to configure our vehicles, speak the language of horse drawn vehicles, and to make conversations between you and where you purchase your carts and parts more fruitful. There is a lot of content in this catalog, so if you need any guidance our dealers and our office is happy to help. As always please remember that nobody can care for your vehicle better than the factory that built it; our craftsmen are amazing at repairing and refinishing your vehicle. If the time has come to freshen up your ride just give us or a dealer a call.

In closing we watched this last year as you delivered some truly remarkable performances in our vehicles. From World and National Championships to the re-emergence of driving at regional shows our sport is alive! We look forward to answering any questions you may have and welcome your feedback about how we can continually improve this publication to better serve you. Please send any comments and suggestions you may have to: sales@jeraldsulky.com. If a truly custom vehicle is something you need please contact our office and we will be happy to get our team working on your project.

Happy Driving!

Erik Lee

Victory Lap Competition Shine Detailer

One of the big issues we hear about here at Jerald is "why does the paint and patent leather of my beautiful Jerald cart have a foggy filmy appearance?" The answer usually comes down to the wrong cleaning product. If you ask horse people what they use to clean their carts, many will quickly reply "Pledge!" Furniture cleaner is wonderful...for furniture. However, our vehicles are finished with automotive style finishes, and the wax that furniture polishes leave behind to help preserve and condition your favorite dining room table have the opposite effect on your cart - it covers up the shine and luster that your finish had when new.

Specifically formulated for use on Jerald Sulky Co. performance horse-drawn vehicles, use Victory Lap Competition Shine Detailer to get a low-friction and deep gloss shine every time you put your vehicle on the track or in the ring. Use this proprietary formula on all hard surfaces including: paint, patent leather, chrome, brass, vinyl, stainless steel, plastic, clear coat and other non-porous surfaces. Safely cleans surfaces of dust, sweat, light oil, fingerprints, water spots, and wax. Works great for all surfaces including vehicles, glass, implements, and throughout your tack room including chrome bit shanks, stirrups, show trunks, brow bands, show girths and other appointments. Victory Lap Competition Shine Detailer contains no wax, petroleum or silicon and is recommended for use on smooth polished surfaces with a clean non-scratch cloth. The formula dries ultra-fast for rapid last-minute results prior to competition. The shine resists dust and will not leave behind a waxy film.

Available in 16oz bottles with sprayer. Order part #205910 MSRP \$19.99

Or search Amazon.com for "Victory Lap Competition Shine Detailer" ASIN: B01MXDOM0D

2019 Catalog Rev. A

Get a clean barn with Jerald Sulky Corn Brooms!

Your search for a great corn broom with a genuine hardwood handle is over! Available direct from the factory, through our Dealer Network, and online Jerald Sulky offers two models of hardwood handle corn brooms!

Sam's Clean Sweep

A tip of the hat to our founder Samuel Jerald – the Sam's Clean Sweep broom is a classic barn and kitchen detailer broom. Sam's Clean Sweep heavy-duty corn broom is made with hand selected natural broom corn for a dust-free finished surface. This broom is very popular in horse barns, workshops, and trailers but is perfect for homes, kitchens and many other applications. It features a 1 1/8" hardwood handle with 4 rows of stitching and a heavy metal band.

The "Big J"

The "Big J" super-duty corn broom is made with a natural corn and rattan fiber blend for extra heavy-duty use. This broom was designed with heavy barn applications in mind such as cleaning farrier debris, wash racks, and feed rooms. It is also very popular workshops, wood shops and other heavy push applications. This broom also features a 1 1/8" hardwood handle with 3 rows of stitching and a heavy metal band.

THE SCOOP

Feed & Supply

*Do you have the need for **feed** in addition to the need for speed?*

The Scoop Feed & Supply, a sister company to the Jerald Sulky Co, now offers nationwide delivery service for many popular brands of horse feed, livestock feed, fresh & dried forage products and ultra clean commodities. If you are tired of dusty oats and broken pellets then you need a more reliable source. With its warehouse in the heart of the northern plains The Scoop Feed & Supply has direct access to some of the best regional feed production plants in the country. The Scoop Feed & Supply delivers full, mixed, and partial pallets of fresh product from exceptional brands right to your farm. Automatic recurring deliveries are available. Take feed off your to-do list and get it delivered fresh from The Scoop Feed & Supply! Don't forget feed for your dogs & cats as well!

Buy-Back Program and Factory Refurbished Vehicles

The market is changing, and so are we. For much of our history we counted on our network of Authorized Dealers to manage the secondary market. New for 2019 we are partnering with our dealers to not only improve the way the secondary market operates, but to bring to market a line of factory refurbished vehicles that are beautiful and affordable. If you fall into one of the categories below then this program is meant for you:

- You are exiting the horse business and have excess equipment to sell.
- You have upgraded your equipment and have older performance vehicles that are not suitable for use in competition.
- You are a new entrant to the horse business and have a tight budget.

All authorized Jerald Sulky dealers are participants in this program; all dealers can buy-back old equipment and all dealers have access to the refurbished equipment list. You can also sell equipment directly to the factory.

To participate in the buy-back program:

1. Grade your cart
2. Contact a dealer or the factory
3. Agree to a buy-back price
4. Coordinate transportation of your cart

Carts are generally valued from 1% to 40% of their new catalogued value for buy-back. Customers may be able to negotiate better prices on used equipment when trading it in on a new unit.

Used units are graded on the following scale:

- U1) Junk – parts or scrap value only.*
- U2) Restoration Candidate – full restoration required.*
- U3) Poor – requires major body repair and is unusable in its current condition. May be a modern cart that has a rusted undercarriage, pitted chrome, or major parts are broken.*
- U4) Fair – Unit has moderate paint loss or damage but is structurally sound; could be hooked to a horse and driven at home for practice. Unit may have old-style parts such as cage-bearing wheels, straight heels, or an unstylized buggy box.*
- U5) Good – signs of wear and use, but intact. Paint scratches do not go through to the substrate. Leather is worn or chapped, textiles are damaged or missing. The cart has all modern styling such as drop heels and new-style hubs.*
- U6) Very Good – The unit might look acceptable from a distance or could be used in the show ring at an unrated show. The cart has all modern styling such as drop heels and new-style hubs.*
- U7) Excellent – The cart could be used now in a rated show. The paint is in good shape with only minor scratches. Chrome is without pitting. The cart has all modern styling such as drop heels and new-style hubs as well as Cordura fabric covers that are in functional condition.*
- U8) Like New – All original with a nearly unused appearance. Only the slightest evidence of handling and use exists on this cart. Matching covers and all textiles are included. Chrome is in factory-new condition and wheels are perfect or near-perfect.*

Contact your Jerald Sulky Dealer to find out what used and factory refurbished equipment is in stock and ready to go today!

Understanding the Jerald Vehicle Families

Much like automobile manufacturers, the Jerald Sulky Company has proven “running gear” families providing the foundation for a number of vehicles. Here is a quick guide to these common components:

Understanding the Jerald Vehicle Families	Vehicle Family	About the Lineup	Variants and Size Options
	The Model A Family <i>Show Pleasure Carts</i>	The Model A, most frequently called the “Roadmaster,” is the Jerald’s premier Show Pleasure cart. This vehicle features an open-wheel design and is available in many sizes to fit a wide variety of breeds from the smallest mini to the largest Friesian. The Roadmaster looks great with the base configuration but is available with an array of upgrades including stained finishes, wood wheels, chrome undercarriage, brass appointments, and the extra tall “Vision” variant for high visibility and unusually tall horses. Drivers of the Model A put their feet in a basket suited for drivers in attire from jods and suits to evening gowns.	<ul style="list-style-type: none"> Horse: 88” & 96” Pony: 66” & 74” Mini: 46”, 49”, 54” & 60” Drop heel shafts are standard, but straight heel shafts can be special ordered The “Vision” is a high-seat variant available through select dealers
	The Model J Family <i>Road Bike/Roadster</i>	The Model J is found in both show cart and jog cart configurations. This vehicle is often called a “Bike” by professional horsemen. When configured as a show cart it is known as a “Road Bike” or “Roadster” and is often dressed with chrome accents for speed classes. As a conditioning and jog cart the Model J is configured with heavy-duty wheels. Drivers of the Model J place their feet in stirrups fastened to the shafts.	<ul style="list-style-type: none"> Horse: 88” Pony: 70” Mini: 46”, 49”, & 54” All varieties use drop heel shafts Available in Roadster show vehicles Available as J conditioning bikes.
	The Model C Family <i>Combination Carts</i>	Three vehicles are offered for those who desire a flexible “Combination” cart or who may be required to use a closed wheel vehicle. Fitted with both a foot basket and stirrups, these vehicles quickly convert to show in both pleasure and roadster classes. Sizes range from the smallest mini to the largest horse. These carts feature a closed-wheel truss-style axle, bench style seat, singletree and a foot basket. Combination carts have fewer amenities on the base models as they are often used both at home and in the show, but they can easily be configured with upgraded appointments including chrome and show pleasure style seats.	<ul style="list-style-type: none"> Horse: 88” (96” special available) Pony: 70” Mini: 46”, 49”, 54”, & 60” <p><i>Prior names for this family include:</i></p> <ul style="list-style-type: none"> Horse Size “Q” Cart Horse Size “Majestic” Pony Jerry Cart Mini Pleasure Cart Coming soon: Western Theme!
	Four Wheel Show Vehicles	Jerald Sulky Company’s four-wheel show vehicles deliver the undisputed ultimate show ring presentation featuring refined lines and hand selected ideal materials; they are genuine objects of performance art. Highlights of the line include the Fine Harness Buggy and the Viceroy. Each vehicle is hand made by experienced craftsmen and can be configured with many combinations of painted or stained components as well as chrome accents to help pinpoint your unique appearance.	<ul style="list-style-type: none"> Model RS Fine Harness Buggy <ul style="list-style-type: none"> Horse size only 76” & 83” Legacy Line Exotics Viceroy <ul style="list-style-type: none"> Horse size 76” & 83” Hackney/Cob size 61” & 66” Hackney/Cob Team Pole Mini Size 49”
	Work and Conditioning Vehicles	The classic and lauded line of Jerald Sulky conditioning vehicles has been significantly upgraded. The Super J+ horse and pony bikes, based on the trusted Workhorse foundation, feature all stainless-steel running gears in a variety of configurations. For those who prefer a traditional option the classic Model J steel frame jogger is available. Jerald work and conditioning vehicles are the default choice for keeping national and world champions in show and race ready condition.	<ul style="list-style-type: none"> Super J+ Horse 88” and 80” QH Super J+ Pony 70” Classic J Horse Jogger 88” and 80” QH Classic J Pony Jogger 70”
	USTA Approved Sulky Models	Jerald’s heritage as a Sulky company remains active and in redevelopment. As of this catalog certain Jerald race vehicles and service parts remain available. Contact your local Jerald Sulky Dealer or Jerald Sulky for more information.	<ul style="list-style-type: none"> XJS Cyclone XJS The Leader The Super Racer Leader The Straightener MS Golden J SR Super Racer

 - Triple Line Multi Color
 - Ribbon & Edge
 - No-Stripe "Clean Pallet"

- Standard pinstripe color options (Many other options are available, most at no additional charge)
 - Black
 - Red
 - Gold
 - Silver

The basics of Pinstripe selection:

At the Jerald Sulky Company all pinstriping work is still done by hand, with a steady clutch on a squirrel hair brush and exceptional skill. Hand laid pinstripe is part of the "fingerprint" of your cart; the imperfections are part of what makes each specimen perfect. Selecting the right pinstripe style not only accents the finish of your vehicle, but it also helps your cart to blend with the appointments of your harness, color of your horse, attire of the driver, and further determines the focus of your overall image.

There are three standard pinstripe styles:

- Double Line: Two parallel lines of the same or different colors.
- Triple Line: Three parallel lines of the same or complimentary colors.
- Ribbon & Edge: Two parallel lines of the same color with the center space between the lines (the ribbon) filled with color.

Don't forget - you may be asked to indicate accent colors; for example, if you build a walnut cart with black double line pinstripe on a black painted undercarriage, you will be asked to indicate complimentary accent colors on the axle such as gold or silver spears.

Custom vehicle appointments including special materials, colors, and pinstripe art is available for many of the above items, but longer production times and additional charges may result.

Size Guidance

This section provides generalized guidance to assist you in selecting the correct size vehicle to fit your horse. *These indications are only a guide.* While we hope you find these measurements helpful, the individual physical characteristics of each horse and the visual preferences of each trainer and driver should be taken into consideration when ordering your vehicle. Your dealer can provide additional guidance on selecting the correct size and may even be able to fit demonstrator vehicles onto your horses in order to confirm that you are ordering the best size vehicle for your needs.

For two-wheel show vehicles

If your horse or pony is:	Your typical shaft length should be:
Over 16 hands	96"
Between 15 and 16 hands	88" or 96"
Between 14.2 and 15 hands	88"
Between 51" and 57"	70" or 74"
Between 40" and 50"	60", 66" or 70"*
Between 36" and 40"	54"
Between 28" and 36"	49"
Under 28"	46"

*Show carts at 60" and below shaft length are built with mini size bodies. Above 60" are built with horse/pony size bodies.

For the Runabout

If your horse or pony is:	Your typical shaft length should be:
Over 16 hands	Test fit an 88" cart or consider custom 96" shafts
Between 14.2 and 16 hands	88"
Between 51" and 57"	72"
Between 50" and 57"	72"
Between 40" and 50"	66"
Between 36" and 40"	54"
Under 35"	49"

*Runabout carts at 54" and below shaft length are built with mini size bodies. Above 54" are built with horse/pony size bodies.

Fitment of Shaft Stops

One of the most popular show cart options is the addition of shaft stops. Shaft stops provide confidence that your long-shaft show vehicle stays exactly where it was hitched with both traditional tie-down and French tug style harnesses. Shaft stops can be factory installed by Jerald Sulky, but we strongly recommended that shaft stops be shipped loose with new vehicles and be installed after properly fitting your vehicle to your horse and harness.

Selecting Wheel Size

Most vehicles in the Jerald Sulky catalog can be fitted to multiple wheel options. The sizing of the wheels is important in the same way as many other elements of your configuration. Selecting a larger wheel creates a more level appearance to a larger horse while selecting a smaller wheel allows you to "get down behind" your horse and let the horse shine in the image. Consult your trainer, a Jerald Dealer, or our office to discuss further the correct fitment of wheels for your need.

Return, Warranty, and Shipping Policies

Many Jerald Sulky Co products are hand-crafted and made-to-order. Therefore, all sales are final for custom products, excluding conditions meeting the criteria for manufacturer defect. To return standard replacement parts, unused products must be returned to the purchasing location within 30 days of purchase. Products that have been used, soiled, or are otherwise not in new condition will only be returned at dealer or manufacturer discretion. There is a minimum 20% re-stocking fee for standard parts returns. Freight is non-refundable and return shipping costs are the responsibility of the customer; it is strongly recommended that return shipments are sent by traceable carrier.

Should a product have a manufacturer defect or an order be fulfilled incorrectly Jerald Sulky or its Authorized Dealer will work with the customer to repair or replace the product and fulfill the order as expected. Manufacturer defects must be identified and remedied on a timely basis. Fitment of a product to your horse, the desire to have ordered a different color, and wear or handling damage do not constitute a manufacturer defect. Natural and stained carts expose the natural grain of the underlying wood substrate including machining marks and variable stain absorption; this wood grain and evidence of the craftsman nature of the product work together to create a unique "fingerprint" for each cart. Jerald Sulky carefully selects wood and other materials to construct each vehicle, including grain and knot placement, but your stained cart will not look identical to any other. Custom order customers are welcome to participate in the wood selection process (and in some cases such as the Legacy Series carts are required to participate) by coming to the manufacturing plant in Waterloo and selecting lumber. However, if a customer is not satisfied with the natural pattern of exposed wood grains or knots this does not constitute a manufacturer defect. Carts and certain parts cannot by the nature of their size be shipped fully assembled; your nearest dealer or the manufacturing plant provides assembly service as part of the sales experience. Should a customer be located too far from a dealer to avail themselves of assembly services and require direct shipment some product assembly is required. When assembling the product a detailed inspection for shipping damage and some minor adjustments are necessary (such as stirrup adjustment arm placement and foot basket installation). Assembly requires minor mechanical ability and a bit of time; failure to properly assemble or adjust a product does not constitute a manufacturer defect.

Our products do not have a warranty other than our commitment to remedy issues determined to be a manufacturer defect. Our products are built to provide years of reliable service, but they are generally connected to a large and unpredictable animal and used in a competitive and sometimes aggressive manner. As a result, we cannot be responsible for issues that arise as a result of using the product. Most often we hear stories about our vehicles functioning for decades but we have also heard stories about a young horse destroying its cart and harness on the first use; this is a risk of the sport, not a responsibility of the manufacturer. Further, the use of our products does not create a liability for us as the manufacturer; most horses are well trained and most reinsman are qualified, but accidents do happen. Cart shafts are made out of wood and harnesses out of leather *because they break*. Should an accident happen, wood shaft carts can break away from the horse allowing the horse to be detached and the situation controlled. Carts therefore must be inspected for damage and structural integrity after any incident and should be inspected or serviced by Jerald Sulky or an Authorized Dealer should structural integrity be compromised.

Jerald Sulky ships products by commercial package and LTL freight carriers. Shipments are insured against damage during shipping. To qualify for insurance coverage against shipping damage, customers are required to inspect deliveries for visible damage before signing any shipper receipt or Bill of Lading. It is the customer's responsibility to confirm any visible damage has been documented by the delivery driver. Customers must report damage to Jerald Sulky or their Authorized Dealer immediately and must open parcels or shipments to inspect products and report any concealed shipping damage within 3 days of receiving a shipment in order for insurance coverage to remain in-force. Freight sent by LTL carrier must be sent to a commercial location with proper receiving and unloading capabilities. Should a customer need additional freight services such as a liftgate or delivery to a residential, gated, or other limited access facility please notify Jerald Sulky or your Authorized Dealer so that accommodations can be made. LTL carriers will charge additional fees for limited access, residential deliveries, and liftgate services not specified on the Bill of Lading and these charges will be billed to the customer.

2019 Catalog Rev. A

Closed Wheel Combination Show Carts

Combination Cart Overview

Horse Size
(Formerly the "Q" and Majestic)

Pony Size
(Formerly the Jerry Cart)

Mini Size
(Commonly referred to as the "Mini Pleasure Cart")

For accessories and service parts refer to the Replacement & Service Parts section starting on page 74

The “C” Cart - Combination Cart Overview

Three vehicles are offered for those who desire a flexible use cart or who may be required to use a closed wheel vehicle in pleasure driving classes. Configured with a closed-wheel “truss style” axle and fitted with a singletree, foot basket and stirrups these vehicles quickly convert from show pleasure to roadster configurations.

These carts have fewer amenities on the base models as they are often used both at home and in the show, but they can easily be configured with upgraded appointments including chrome wire-spoke wheels and chrome undercarriage appointments.

These models can be more complex to order as a result of the wide variety of ways these carts can be configured. If you have questions about your configuration, you should consult your dealer or the Jerald Sulky offices.

Important configuration options to note include:

- **Wheels:** Combination Vehicles are configured by default with 18” heavy duty stainless steel wheels. These wheels are the same wheels offered on our Super J+ conditioning carts and while attractive and very durable they do not have the same luster as the chrome wire-spoke wheels. If a show cart is being built using the Combination cart foundation, you will likely want to select the 24” chrome wire-spoke wheel upgrade.
 - *Note on wheel sizing: We know that tire sizes can be confusing – for example how does an 18” and a 24” tire fit on the same cart and look right? The answer has to do with the way that wheel measurements are established by the motorcycle and bicycle industries. Our 18” wheel is fitted with a “street legal moped” tire; street legal wheels measure the diameter of the wheel. In contrast, the 24” chrome show wheel fitted with our Jerald branded flat-tread tire is considered a bicycle wheel; bicycle wheels traditionally indicate the outside diameter of the tire. So even though you might perceive these two wheels as significantly different, they are actually both similar in size and are both proper fitments to the Combination line of carts.*
- **Seats:** Combination Vehicles can be configured with either a bench style roadster seat (default), or a show pleasure style seat with a seat-rail and removable cushion. It is important that you select the option that is correct for your situation, as this configuration cannot be easily changed after your vehicle is manufactured.

Above: Mini Pleasure Cart configured with 24” chrome wheels, chrome undercarriage, and a bench style roughout leather seat.

The “Legacy Series” Fine Harness Buggy

Define your legacy with one-of-a-kind performance collector vehicles.

For the show ring or the carriage house display hall.

Model RS Legacy Series Fine Harness Buggy

Overview

Express your legacy with a vehicle for which there is no comparable. The Legacy Series, typically built on the Royal Classic Fine Harness Buggy chassis, is created to the exacting specifications of each owner. Crafted from hand selected exotic timber species and garnished with appointments reserved for only the most exceptional vehicles, each Legacy Series vehicle is yours to enjoy in the show ring, in your carriage house, and as a lasting heirloom.

Starting at \$150,000

Elements

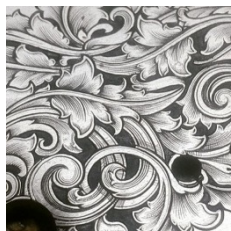

Image

Description

Timber Species Selection

Hand crafted of the most exotic and beautiful woods on the planet, the legacy series vehicle timber selections include species such as Waterfall Bubinga, Lacewood, Macassar Ebony, and Afzelia Xylay. Components of the vehicle can even be made of heirloom or remnant furnishings of true meaning and birthright.

Appointments

Capstone finishes including gold touches, deep cut scrollwork, fine textiles, candied paints, and custom hand striping accent the vehicles.

Design and Delivery

Delivery times for Legacy Vehicles can vary from months to years depending on the requirements of the owner. Several design and material selection sessions are likely necessary during the pre-construction phase. Vehicles are delivered by white-glove service to both domestic and international destinations.

2019 Catalog Rev. A

Services

2019 Catalog Rev. A

The Jerald Sulky Company offers many services for your existing vehicle including refinishing, tune-ups, and accident repair. It is generally necessary to return your vehicle to the plant in Waterloo, IA to obtain these services, but the resulting outcome can be a like-new vehicle for less than the cost of buying new. *There is no substitute for a factory refinish when it comes to making your vehicle look it's best, and the cost of factory services are often less than secondary market providers.*

Refinishing service base price includes strip-down of your existing finish, repair of minor structural defects, new paint/stain and pinstripe, new leather shaft appointments, and balancing & tune-up. Refinishing services do not include repairing, replating or replacing chrome components and any additional required parts are charged in addition to the base refinish price.

Factory Services		
Service	Part #	Typical Cost
Refinish a 2-wheel vehicle. <i>Does not include wood wheels.</i>	Painted 481110	Starting at \$1000
	Natural/Stained 481111	Starting at \$1200
Refinish a 4-wheel vehicle. <i>Includes refinish of one matched shaft assembly.</i>	Painted 481210	Starting at \$2200
	Natural/Stained 481211	Starting at \$2400
Refinish 4-wheel vehicle Shaft Assembly Only.	Painted 481212	Starting at \$850
	Natural/Stained 481213	Starting at \$999
Refinish wood wheels. <i>Price is per pair.</i> <i>Does not include repair of rubber tire or chrome hubs.</i>	Painted 481314	Starting at \$490
	Natural/Stained 481315	Starting at \$590
Specialty work, accident repair, refinishing of non-Jerald brand vehicles, and refinishing of post-production models.	T&M	Estimates Provided
Shaft point splice. <i>Includes new leather points. Additional repair or parts are billed at Time & Materials cost.</i> <i>(For a shaft splice to be successful the break <u>must</u> be under the leather point.)</i>	481312	Starting at \$265
Re-leather vehicle service – special service package price. <i>Includes installation of all leather parts by a Jerald Sulky Co technician and all required leather components. A \$396 value purchased ala carte.</i>	481313	\$345
Re-leather Parts <i>Includes required leather and/or screen material and labor.</i> <i>Does not include re-plate chrome or brass buffing if needed.</i>	Roadster Screen Dash 100136	\$130
	Patent Show Cart Dash 100135	\$140
	Patent Legacy Vented Dash 100133	\$160
	Patent Devon Viceroy Fender 100134	\$140/Fender
<i>Also, be sure to look for our Jerald Sulky Co. Authorized Dealer mobile stores and services at horse shows and events. Many primary services can be performed at these locations including replacing tubes & tires, general tune-ups and creak/squeak repair, leathering, and upgrades such as new seat cushions, wood wheels, and dashes.</i>

Four Wheel Vehicle Replacement Shafts

Individual Replacement shaft components for four wheel vehicles are generally not sold. Components of four wheel vehicle shaft sets including wood components and irons are built by Jerald Sulky craftsmen to produce a perfect article based on the unique characteristics of the materials selected for each shaft set. As a result customer replacement of an individual component is rarely possible and damaged shaft sets should be sent to the Jerald Sulky Co. factory for repair and refinishing. Complete replacement shaft sets can be found in the "Options and Accessory" pages of each four wheel vehicle.

Runabout Replacement Shafts – Finished in Natural with Tip

Runabout shafts are easily replaceable by the consumer and come complete with tip installed. Does not include shaft stop.

Runabout Cinardo Chaffee	Mini - \$190				Pony - \$210				Horse - \$225	
	49" Left	49" Right	54" Left	54" Right	66" Left	66" Right	72" Left	72" Right	88" Left	88" Right

Vehicle Ordering Guides

2019 Catalog Rev. A

Vehicle Ordering Guide Use Instructions

Much like ordering a car from your favorite automobile manufacturer, ordering a vehicle from the Jerald Sulky Co. includes many choices and options. As a result, order accuracy is a key element in receiving exactly the vehicle that you want. We recognize that this process can seem a bit daunting, so the following Vehicle Order Guides are provided to offer step-by-step assistance in accurately specifying every vehicle choice for some of the most common vehicles in our catalog. Additionally, where complete vehicles are listed in the front of this catalog, selections are indicated as “Required,” “Conditional,” and “Optional.”

- For each section marked as “Required” a part number selection is necessary, even if the option indicated that the choice is “Declined.” If no part number is indicated for a “Required” selection the order will be returned to you by the Jerald Sulky Co. office until a selection is indicated.
- For each section marked as “Conditional” read the accompanying text carefully as the selection is based on a previously selected condition regarding the way you are building the particular vehicle.
- For each section marked as “Optional” no selection is required unless the option is desired in the custom configuration of the vehicle you are building.

Each guide includes the following sections:

- Core Vehicle Selection: These are the part numbers that describe the primary vehicle configuration that you are selecting – you must select one.
- Accessory items not specified on a SO line item: This area is informational only, and lets you know about features of your vehicle that are included by default and do not need to be specified on the order.
- Vehicle Choices Section: This includes descriptive items that you must indicate about a vehicle, such as the primary body color, pinstripe pattern, and pinstripe colors.
- Options and Upgrades Section: This section contains selections specific to the vehicle that you are configuring.
 - When a selection is indicated as [Required] you must specify an item number from that section on the order. Failure to specify an item from each [Required] section will cause the order to be delayed while the dealer service team works to specify the item.
 - When a selection is indicated as [Optional] it is only required if the selection is desired by the customer; these items are often add-ons such as the inclusion of a vehicle cover or the addition of stirrups to a Mini Pleasure cart.
 - “Items to Consider” are suggestions for common inclusions with a vehicle package; these include equipment like an additional shaft assembly for a Viceroy or spare tubes and tires for your wheels.

2019 Catalog Rev. A

Model A Roadmaster Horse Size

Core Vehicle Selection

821001 88" Drop Heel Standard
821005 88" Drop Heel Vision
821011 88" Straight Heel
821015 88" Straight Heel Vision
821002 96" Drop Heel Standard
821006 96" Drop Heel Vision
821012 96" Straight Heel
821016 96" Straight Heel Vision

Accessory items not specified on a SO line item:

- The Roadmaster is always trimmed with patent leather appointments unless custom specified.

Items that must be specified on a SO line item:

- SO Vehicle Choices section:
 - Primary Color
- SO Options and Upgrades section:
 - [Optional] Natural or Stained Body
 - 691010
 - [Required] Pinstripe Selection
 - 100151A Double line Same Color [Indicate color]
 - 100151B Double line Two Color [Indicate colors]
 - 100151C Triple Line Any Color Combo [Indicate colors]
 - 100151D Ribbon & Edge [Indicate colors]
 - 100151Z Pinstripe Decline
 - [Required] Undercarriage Finish Selection
 - 692110HDP Painted & Pinstriped for Drop Heel Vehicles [Indicate color]
 - 692110VDP Painted & Pinstriped for Drop Heel Vehicles [Indicate color]
 - 692110HSP Painted & Pinstriped for Straight Heel Vehicles [Indicate color]
 - 692110VSP Painted & Pinstriped for Straight Heel Vehicles [Indicate color]
 - 692110HDC Chrome for Drop Heel Vehicles
 - 692110VDC Chrome for Drop Heel Vehicles
 - 692110HSC Chrome for Straight Heel Vehicles
 - 692110VSC Chrome for Straight Heel Vehicle

Model A Roadmaster Horse Size Continued...

- [Conditional] Seat Rail Selection
 - 691020P Painted
 - 691020C Chrome
